## ACRYLIC BIN SYSTEMS

Create the perfect display for beads, marbles, tumbled stones or other small items that take up a lot of counter space. Instead of hiding merchandise in boxes and baskets, use these all-clear acrylic bins to give visibility and let light through.

We have several different sized bin systems to meet your needs. Each system is made up of two endpieces and a selection of trays. The trays all have different numbers of glued-in dividers.

### To order bin systems, you need to:

1. Choose which size system you want: Standard, Wide, Narrow, Extra-Large, or Mini. The tray size is the main difference between the systems.
2. Choose how many tiers of trays you want in the system. (From two – six)
3. Choose from the divided-tray options listed with each system to get the trays with the compartment sizes that you need.
4. Order the side-end pieces and trays separately

### Standard Bins

Our standard bin system is made up of 16"-wide trays that are 2<sup>5</sup>/<sub>8</sub>" high and 4" deep. choose the tray style (number of compartments) from Standard Tray options below. All systems pack unassembled for easy shipping and come with nylon thumb screws for assembly.

# Display Blocks and Bases

A base is often the important finishing touch for a collectible or item of merchandise. Many companies use bases to permanently mount their products, such as minerals, fossils or seashells, or temporarily mount special items. (See the end of this chapter for adhesive and mounting tack.) A base can give a piece a finished look or call attention to its uniqueness. Rough-edged items may benefit from a base. You can create a grouping of several items on a single base and bases of various heights can create interesting arrangements.

Highly polished, crystal clear bases. You may also order most of our clear acrylic blocks and bases with a frosted finish. The price is the same, but you need to indicate your choice by adding an "F" to the item number (for example, #F44F).
